## Screw Clamp

The screw clamp offers many possible applications. It is particularly useful for lifting, transferring and pulling sheet metal, girders and steel constructions.

Please note that the spindle must be hand-tightened to the material.

Once the screw clamp is tightened and lifting begins, the pivoting pad clamping system produces a wedging action against the material, holding it securely.

Model	Capacity t	Jaw capacity Z mm	weight kg	A mm	B mm	Ø C mm	D mm	E mm	F mm	X mm
